

## **Google Translate Tool Video Transcript**

This video will show you how to use the Google Translate tool that is on each page of this website. The tool will always be in the upper left corner of each page. To change languages, click on the arrow next to where it says "Select Language". You can use the scroll bar to select the language you'd like to translate to. When you click on your selected language, the page and the navigation bar will refresh in that language. Each page you click on will also be translated, but it may take a few moments. You can switch back to English by following the same steps. Click on the arrow, click on English. Your page will refresh in English.
